

LHD

Transforming Productivity

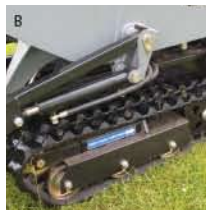

Whether you are a concrete worker, landscaper, contractor, farmer, snow removal professional or simply own land where you have the need to load, haul or dump, LHD Machinery will provide you with the only skid steer dumper you will ever need.

LOAD... HAUL... DUMP... ALL WITH THE SIMPLE PUSH OF A LEVER.

LHD 4000

The LHD 4000 is our base model but there is nothing base about it. With simple intuitive controls, a strong engine, a large capacity bucket and compact design this machine will get you in and out of most anywhere and get the job done faster. This machine also allows the user to work smarter... not harder... The LHD 4000 is a complete package that doesn't just haul and dump like most conventional buggies or tracked haulers. The included self-loading shovel loads the bucket itself saving workers time and effort. Now you can quickly and reliably accomplish jobs on your own that would normally take multiple people much longer. Transforming productivity... that is what we are all about!

- Front shovel loads the bucket quickly (Picture A)
- Steel Frame is designed for overall Strength and Performance.
- Hydraulic Dump with ground clearance when in the full dump position.
- Heavy-Duty Steel Dump Bucket for long life.
- Narrow body allows for entry into small areas
- 11 cu. ft. (.4 yards) Cubic Foot Bucket Capacity for more productivity.
- Rubber Tracks For Extra Load Capacity and Traction. (Picture B)

Engine: Honda Horizontal Shaft (13hp) with Electric Start

Weight: 1235 lbs. (560 kgs)
